Yes, absolutely agree that this is needed. We need to make sure that everyone is onboard (best case) or at least not caught off-guard by the release. I've also wondered if this should be an agenda item on Bruce's ORD PFAS call.

I am thinking we should add an item re: defining on a process for briefing AAs on the public instance of the PFAS data explorer before it goes live.

I would like to think we did not have to go Program by Program, but that may be what it takes.

Now that we are getting close to going live, I think the reality is starting to sink in... I heard today that OLEM also has concerns....

Do you agree re: adding an agenda item? I can lead the discussion at the cross agency level.
